PROFESSIONAL EXPERIENCE

WEFIT DIGITAL SERVICE DESIGN, São Paulo, SP   2022 - Present
Software Engineering - Delivering Register App (2024-Current)
- Development and integration of new features in a hybrid mobile application project using **React Native Expo**.
- Building and releasing versions on Play Store and App Store.
- Performed an in-depth review and classification of application workflows, pinpointing and addressing bugs, logical flaws, and security vulnerabilities, resulting in a 40% improvement in overall application reliability.

Software Engineering - Development Patterns and Code Responsible - Health App (2023-2024)
- Designed and implemented new features, ensuring seamless integration into existing systems.
- Overseeing a team of 6 software engineers in a hybrid mobile application project using **React Native CLI** with a white label pattern for more than 3 companies.
- Conducted comprehensive analysis and optimization of application processes and flows, identifying and resolving bugs, logic errors, and vulnerabilities, which enhanced application performance and user experience, improving the app from 1.4 points to 4.6 points in Play Store.

Main Front-End Developer - Dentistry App (2022-2023)
- Carried out a thorough evaluation and classification of application workflows, detecting and fixing bugs, logic issues, and security vulnerabilities.
- Resolved all issues in the hybrid mobile application project utilizing **React Native CLI**, enhancing functionality and user satisfaction.
- Implementation of facial recognition by photos, to improve performance of the requests, sending just a crop of the facial part of the images to grant access to a feature of appointments.

Software Front-End Developer - Delivering Track Web App (2022)
- Development and integration of global components (as charts and filters) at a PWA using **React.**

INFOCAP, Novo Hamburgo, RS   2022
Software Developer (2022)
- Development of new components to the main company intern library using **Angular 7**.
- Analyzed and categorized application processes, searching for bugs, logic errors and vulnerabilities, as well as UI/UX and performance issues.

SELF EMPLOYED, Capão da Canoa, RS   2021 - 2022
Full Stack Software Developer - Hotel Website with CMS features (2021-2022)
- Development of the website and the dashboard for content filling using **React**.
- Development of API Restful using **ExpressJs** to insertion of hotel data (including images) and providing that data to the website.
- Setting up **AWS** instances and managing production environments for deploying both APIs and websites, including handling server configurations, **MongoDB** database integrations in cloud, and ensuring secure and scalable deployments.

SKILLS

Front-End Web and Mobile Development
